

National Weather Service

Wilmington, NC

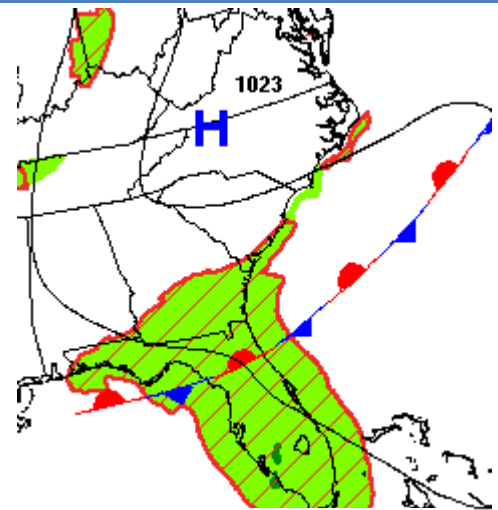

Outlook Period: Fri August 24 – Sun August 26, 2018
 Time Issued: 9:00 AM Fri August 24, 2018

Prepared by: Tim Armstrong

..Ideal weather today, gradually increasing temps & humidity this weekend..

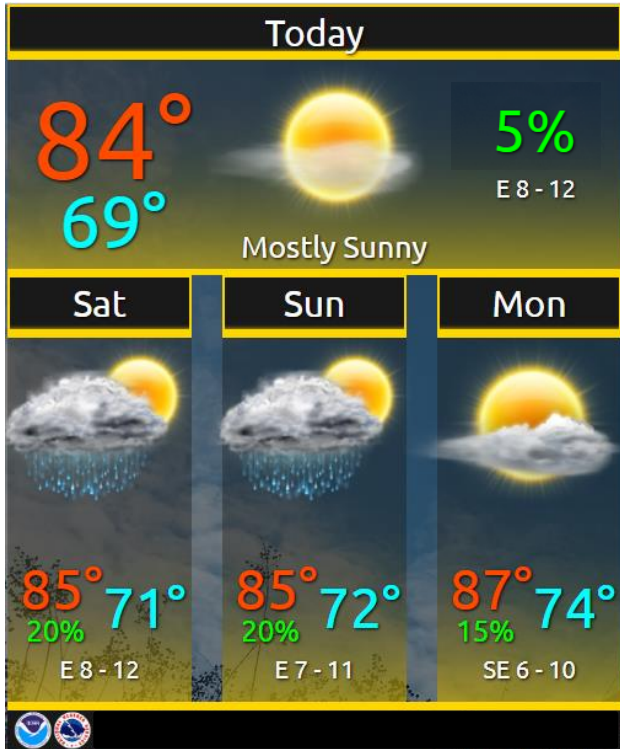

Overview: Canadian high pressure will push off the East Coast today, allowing a front across Florida to return northward. As this front approaches Saturday, isolated showers could develop near the coast. Otherwise dry weather is expected this weekend along with a gradual warming trend.

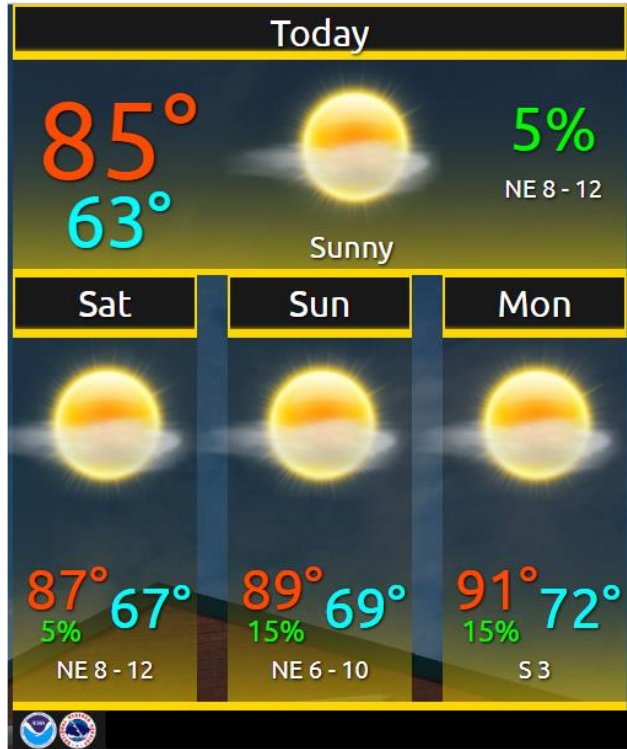

Current Weather Map

Impacts: No significant weather impacts are expected.
