

# Weekly Weather Briefing

**Friday, November 1, 2019**

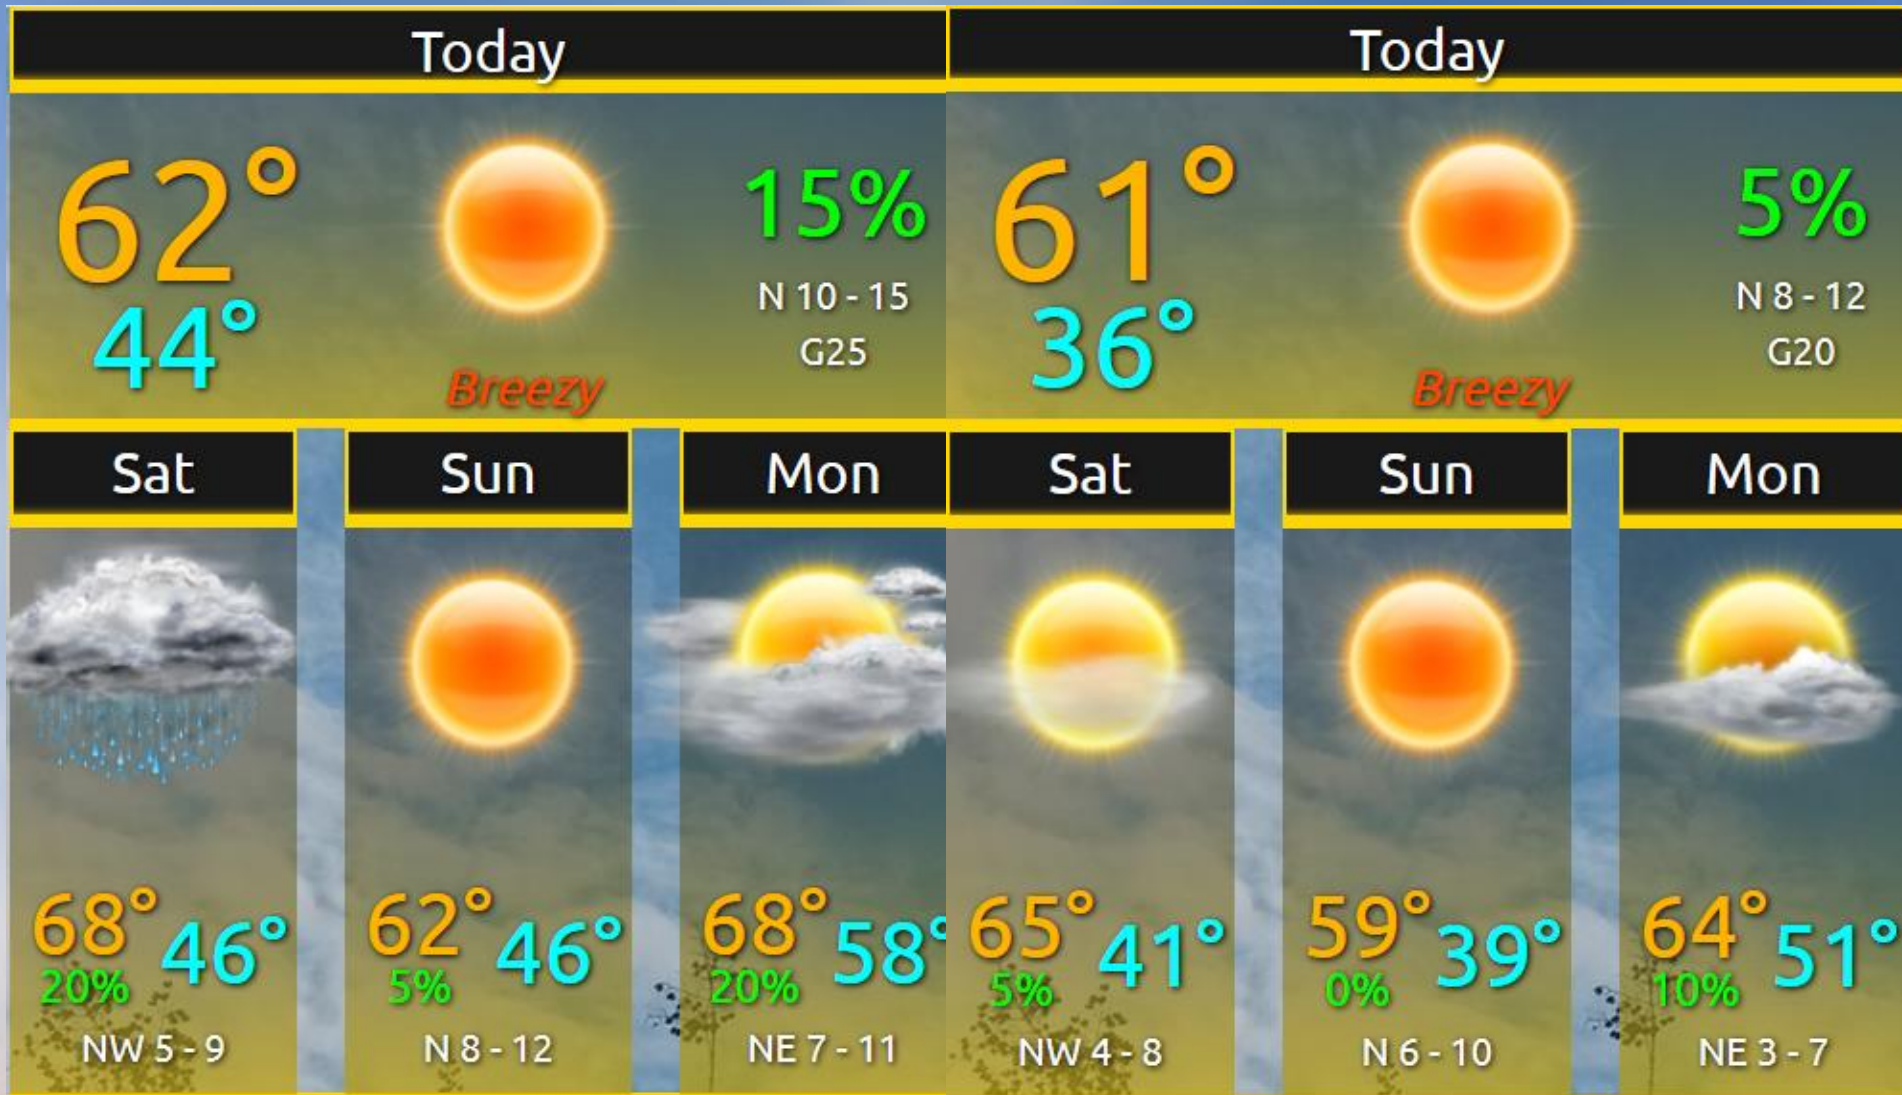

*Issued Every Monday and Friday*

Weather Forecast Office  
**Wilmington, NC**

**Disclaimer:** *The Information Contained within this Briefing is Time Sensitive, and Could Affect its Validity as the Date/Time Moves Away from the Briefing Creation Date/Time.*

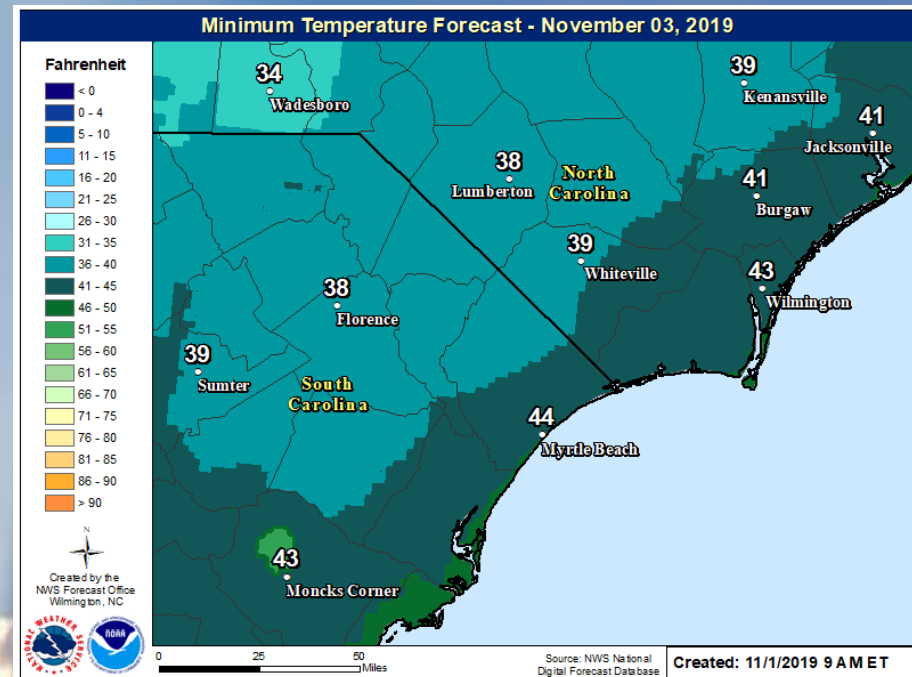

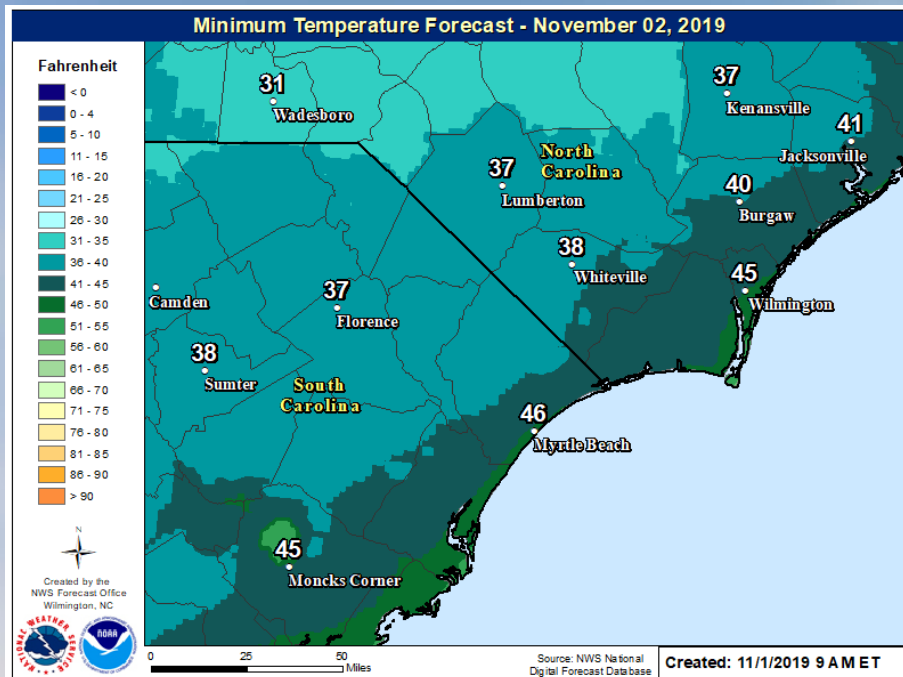

## Highlights

- Crisp Fall weather today through the weekend for most of the area with some of the coldest temperatures of the season.
- As low pressure develops along lingering front well off the coast of Cape Fear, some low clouds and slight chance of a sprinkle will be possible closer to the coast through Saturday morning.
- Reinforcing shot of cold and dry air will come late Saturday through Sunday with brisk northerly winds.
- Patchy frost will be possible in wind sheltered spots, mainly west of I-95 early Sunday morning.
- The coldest temperatures of the season will come Sunday night with some spots down within a few degrees of freezing well inland.
- For marine interests, Small Craft Advisory conditions will end today, but may come back briefly with cold surge early Sunday.

Coastal Locations vs. Inland Locations

# Minimum Temperature

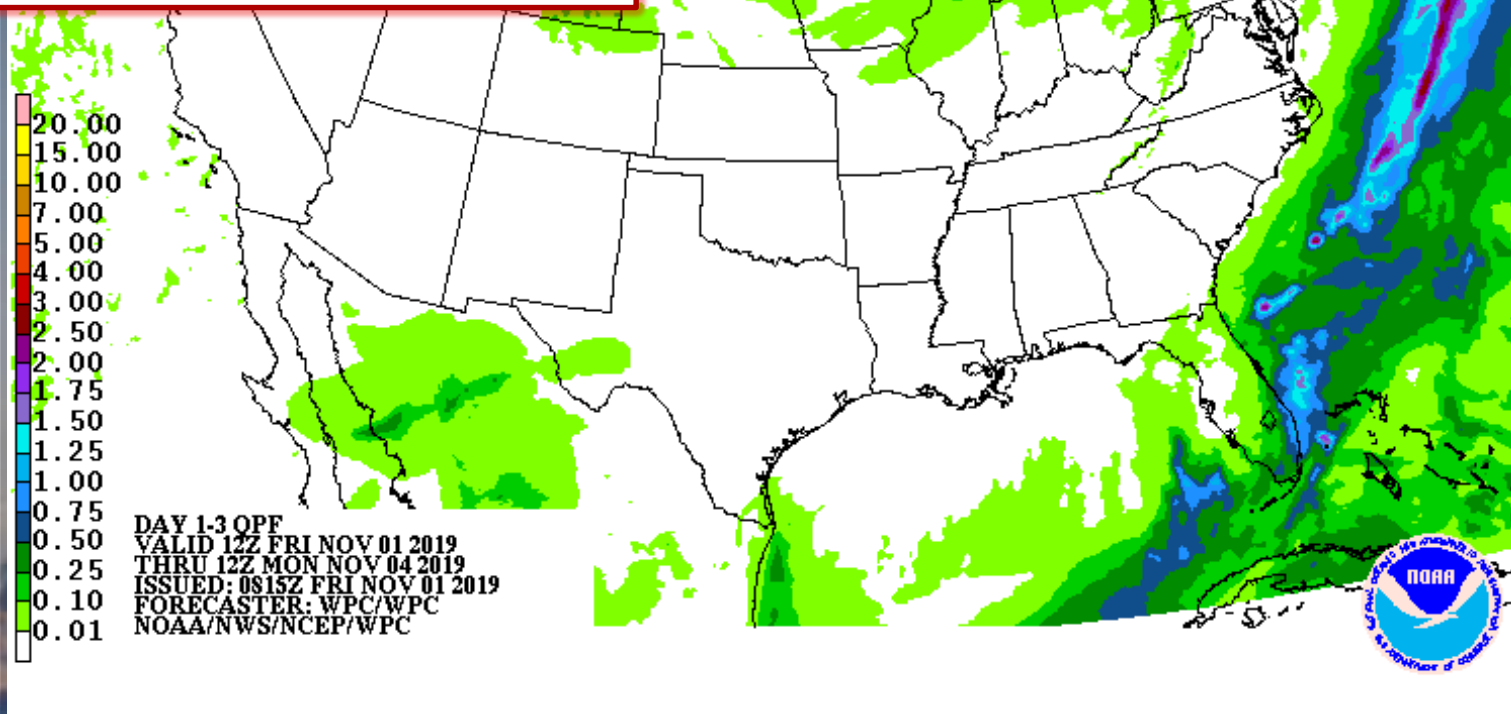

Some of the coldest temperatures of the year this weekend with overnight lows falling below 40 over a large portion of the area and potential for patchy frost. Places along the coast will be slightly warmer, but cool northerly winds will make it feel cooler.

## Forecast Rainfall Through Sunday Night

Rainfall will remain offshore with only a slight chance of sprinkle along the coast Saturday morning.
